

SMART - FAST - RELIABLE

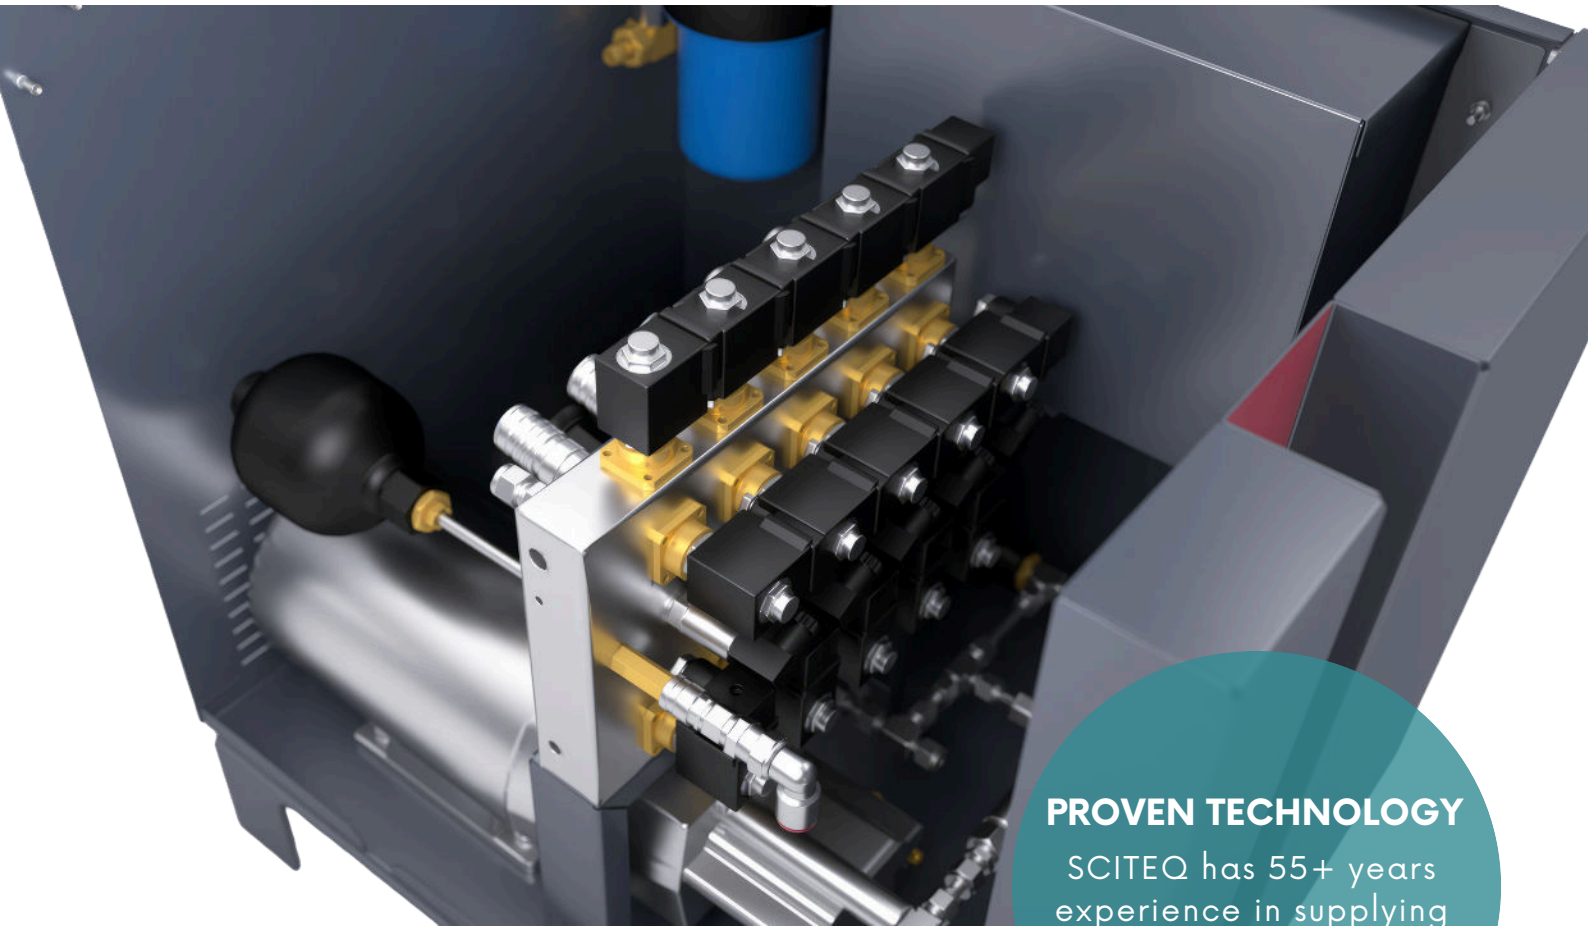

LITEFIVE

Compact cost-efficient test unit for internal hydrostatic pressure test. This unit offers reliability and accuracy in testing, and complies with a long list of international standards, such as ISO 1167 and ASTM D1598 and D1599.

The liteFIVE test unit offers 5 independently operating airless pressure stations in a compact cabinet.

The unit is controlled via user-friendly SIGMA software ensuring a stable and linear pressure regulation. The browser-based interface offers a recipe system, for easy control and fast initiation of test.

liteFIVE is designed for smaller labs and/or testing of smaller dimensions pipe and fitting samples.

BEST IN CLASS PRESSURE REGULATION

- ASTM D1598 & ISO 1167
- for static, step & burst test of pipes
- Fully automatic recipe based test
- Up to 100 bar
- Flow max. 2 l/min.
- The most user-friendly interface available
- offering extremely precise regulation and flow.

PROVEN TECHNOLOGY

SCITEQ has 55+ years experience in supplying high-end test equipment worldwide.

MARKET LEADING SOFTWARE

SIGMA SOFTWARE

The interface is fast, simple, and intuitive, allowing effortless control and operation of all tests. Key features include dynamically adjusted finish times, a complete station overview, and navigation with very few clicks. Recipes are quickly set-up, saving time when starting up a new test or repeating tests.

Auto-generated reports are available immediately on finished test. And the software is compliant with the CRA Cyber Resilience Act, ensuring robust cybersecurity, regulatory alignment, and enhanced protection of critical data.

ADVANTAGES OF THE SOFTWARE

- Wireless browser based software
- Easy recipe based solution
- Dynamically adjusted real-time finish time
- SQL database
- Auto-generated reports
- OPC UA and Industry 4.0 prepared
- CRA (Cyber Resilience Act) compliant

SMART TESTING. PROVEN EXCELLENCE
