

Intelligent pressure testing

One platform

Connects all Sciteq test equipment in a single unified interface.

Easy to use

Intuitive design means operators get results – less complexity

Predictive quality

Data across tests enables trend analysis, early warning and process optimisation.

Intelligent, simple, accurate

the browser-based test automation platform that makes intelligent pressure testing simple and accurate.

WHY SIGMA

- 1. Time savings in daily operation.** Tests can be started in just 3 clicks once a recipe has been created, and the browser-based UI is accessible from any device — no installation and no dependency on one specific lab PC.
- 2. Cost-effective upgrade path.** Upgrading existing equipment can save up to 70% of the investment compared to buying a completely new system.
- 3. Better real-time decision-making.** The integrated InfluxDB database mirrors test data continuously to the local server. Data can be monitored and analyzed while a test is running — not only afterward.
- 4. Seamless integration with data management systems.** Safe integration with external data management systems such as Pipeson, iDOO and OPC UA. Cyber security CRA and NIS2 compliance.
- 5. Reduced downtime through remote support.** Because the test system can be accessed online, SCITEQ's technical support can connect remotely to help operators troubleshoot issues as they arise, rather than waiting for a scheduled site visit.

Why Tweetop chose SIGMA

"We are very satisfied with the SIGMA system. The software is intuitive and far less complicated than the equipment we used previously.

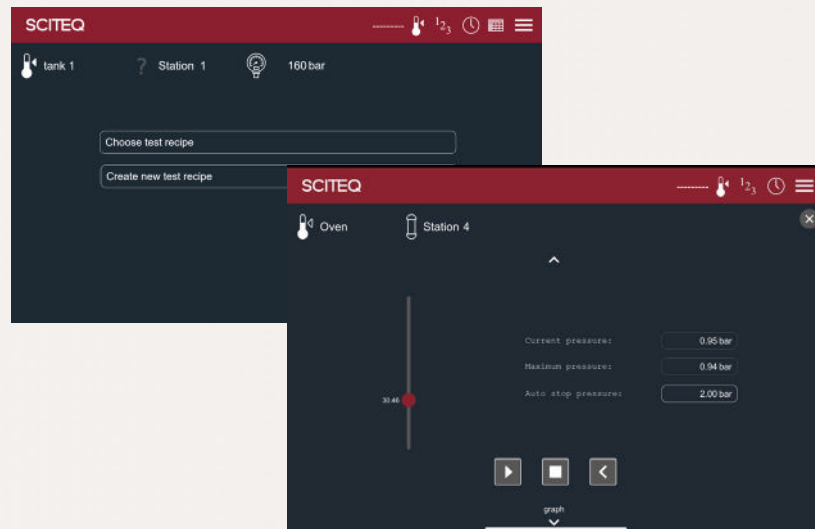

The ability to monitor and troubleshoot tests remotely from an iPad or computer adds great convenience.

The recipe function makes it easy to handle different sample sizes, users, and test setups—saving us a significant amount of time in our daily work."

Natalia Margiel, Quality Control Laboratory Manager at Tweetop, Poland.

The intuitive browser based user-interface

- Start test in 3 clicks
- Easy test setup with recipe system
- Instant report generation
- Real-time overview of test progress and system status

WHO WE ARE

- RELIABLE knowledge partner in plastic pipe quality testing.
- PRECISION test data delivering actionable insights.
- PEOPLE you know in support, sales & engineering.
- CONNECTED to your business.
